Notes:

Investment performance returns are based on unit prices, and shown after the deduction of investment management fees and tax except the options which are untaxed.

N/A applies to options running less than the indicated time periods.

The inception date for the Sustainable Growth option is 29 March 2021, so no long term investment performance is available for this option as yet.

When you switch or withdraw your benefits, the buy or sell price that is normally used is the latest buy or sell price that has been loaded onto the administration system at the time that your transaction is processed. If there is a discrepancy between the returns or sell prices on this website and what is on Rest's administration system, the returns or sell prices on the administration system will apply.

Past performance is not an indication of future performance.
