Rest Advice is provided by Rest staff (Rest Advisers) as Authorised Representatives of Link Advice Pty Ltd ABN 36 105 811 836, AFSL 258145 (Link Advice). Rest Digital Advice is provided by Link Advice. Rest Advisers are paid a salary and do not pay or receive commissions or fees for advice provided to you. Rest Advice may be accessed by members without incurring additional fees for simple advice on your super account. If you need more complex advice from a Rest Adviser you'll be charged a fee which will vary depending on the complexity of the advice and will be agreed with you before advice is given. You can obtain a full copy of the Rest Advice Financial Services Guide by calling us on 1300 300 778. Information in this document is up to date at the time of preparation.

01

About this booklet

We've created this booklet to help you understand changes to our investment options.

We recently reviewed and decided to streamline our selection of investment options. For some of you, this means making a choice about how you'd like us to invest your super moving forward.

We've created this booklet so you can understand:

1. How our investment options are changing (including which options are being closed);
2. What replacement investment options we'll be switching you into, if you're in a closing option;
3. What to do if you'd like to make changes to your investment options or choose a different option for your current account balance or your future contributions; and
4. The range of investment options available to you from 30 September 2024.

After reading this booklet, you may consider choosing an alternate investment option (that is different from the replacement option) for your current account balance and/or future contributions. Or, if you're not sure how you'd like to invest your super, you can use the online **Investment Choice Solution**¹ at **go.rest.com.au/investmentchoicesolution** to help you work out which Rest investment option might best suit you.

Reading the fine print

You can also refer to the Investment Guide (which forms part of the Rest Super and Rest Corporate Product Disclosure Statement) available at **rest.com.au/pds** for more information on the basics of investing in super including understanding asset classes and risk, as well as information on responsible investing.

¹ Rest Digital Advice, including the Investment Choice Solution, is provided by Link Advice Pty Ltd ABN 36 105 811 836, AFSL 258145.

02

How our investment options are changing

We've refreshed and simplified our investment options to make it easier for our members to understand and compare options when making an investment choice.

Some options are closing, some are changing, and one is even getting a new name. To make this easier for you, we've pulled together a snapshot of these changes, which you can read about in more detail in this booklet.

The changes in the table below are effective from 30 September 2024.

Why we're closing some options

After reviewing Rest's investment options and looking at a range of factors, we decided to close some of our investment options – Bonds, Property, Diversified, Shares, Australian Shares and Overseas Shares. The aim is to simplify and streamline our range of investment options, to make it easier for our members to understand and compare.

Name change for Core Strategy

We're changing the name of Core Strategy to Growth. We think the new name is clearer and better reflects the option's growth investment focus. The change of name won't change how the option is invested or the expected level of risk or return of the option.

Updates to investment objectives

From 30 September 2024 there are updates to how we describe the investment objectives for the Capital Stable, Balanced, Growth (currently known as Core

Strategy), Sustainable Growth and High Growth investment options. The updates outlined in the table below don't change how your super is invested, or the level of potential risk or return of the option – it means the way we describe and measure our investment objectives makes it easier to compare with other super funds. The updates are:

- **Fees and taxes now shown in the investment objective** – we've made it clearer that the objective (our target investment return) is after the deduction of fees and taxes.
- **Extending the objective timeframe for measuring Capital Stable and Balanced options** – we'll now measure how these options are performing over longer, rolling 10-year periods.

The table below shows the current and new investment objectives for the affected options.

Current and new investment objectives*		
Investment option	Current investment objective	Investment objective from 30 September 2024
Capital Stable	CPI +1% pa over the medium-term (rolling 4-year periods)	CPI +1% pa (after fees and tax) over rolling 10-year periods
Balanced	CPI +2% pa over the medium-term (rolling 6-year periods)	CPI +2% pa (after fees and tax) over rolling 10-year periods
Growth (known as Core Strategy until 30 September 2024)	CPI +3% pa over the long-term (rolling 10-year periods)	CPI +3% pa (after fees and tax) over rolling 10-year periods
Sustainable Growth	CPI +3.5% pa over the very long-term (rolling 12-year periods)	CPI +3.5% pa (after fees and tax) over rolling 12-year periods
High Growth	CPI +4% pa over the very long-term (rolling 12-year periods)	CPI +4% pa (after fees and tax) over rolling 12-year periods

* The Consumer Price Index (CPI) measures inflation. As inflation can reduce the value of your retirement savings over time, we use CPI as a benchmark to help measure if your investment returns are staying ahead of inflation, to maintain your buying power when you retire.

Asset classes: risk and return

Most investments fall into two broad groups – defensive assets and growth assets – which have different risk and return characteristics.

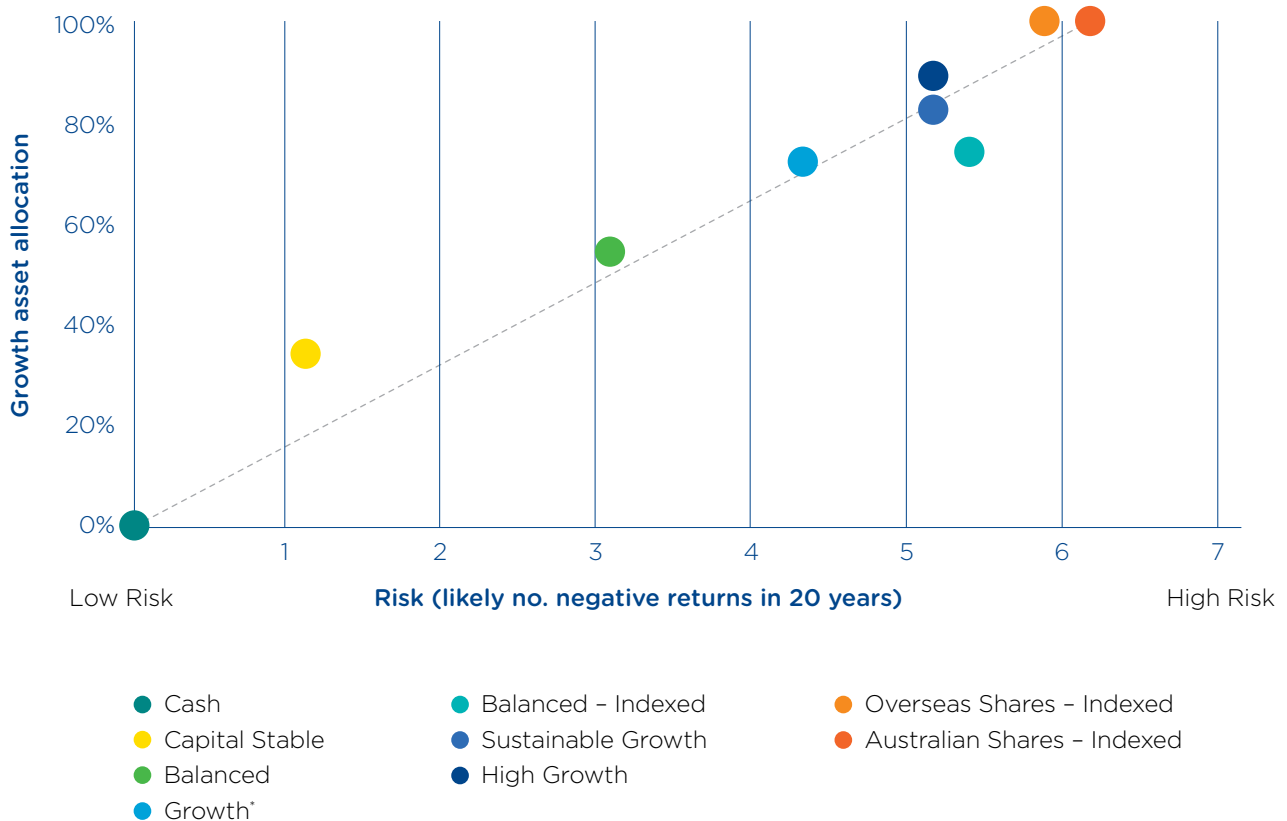

For Rest investment options available to members from 30 September 2024, the diagram below shows how as the allocation to growth assets increases, there is an increase in risk (as measured by the likely number of negative returns over a 20-year period). This is based on the Standard Risk Measure (SRM), which is an industry standard to compare investment options across different super funds.

Defensive assets are lower risk, so the chances of a negative return are less but their returns are usually lower and may not keep pace with the cost of living. Defensive assets include cash and debt (fixed income).

Growth assets aim to increase the value of your investment. Historically they have produced higher investment returns but have an increased risk of negative returns over the short term. Growth assets include Australian shares and overseas shares.

Property, infrastructure and alternative assets as asset classes can have both growth and defensive characteristics, although the individual investments may have either more growth or more defensive features.

Your investment choices

* Known as Core Strategy until 30 September 2024.

03

The replacement options

If you're invested in an option that's being closed, the balance you have invested in it will automatically be moved to a replacement option on 2 November 2024.

You can also switch to another option of your choice (we'll go into more detail about how to do this in the next part of this booklet).

The automatic switch of your current account balance will happen if you don't decide to make your own investment switch before the cut-off date (explained in the section below). The replacement option for each closing option is shown in the table below, with information on why this option was selected:

The replacement options		
Closing option	Replacement option	Why we made this choice
Bonds	Capital Stable	The Capital Stable option mostly invests your super in defensive assets (up to 75%), with a high allocation to cash and bonds. It is the most similar option to Bonds in terms of expected risk and return.
Property	Balanced	The Balanced option splits your super fairly evenly between defensive and growth investments. It has a similar risk and return profile to the Property option.
Diversified	Growth (known as Core Strategy until 30 September 2024)	The Growth option invests your super in growth and defensive assets in a similar way to the Diversified option. The expected risk and return levels are very similar.
Shares	High Growth	The High Growth option mostly invests in Australian and overseas shares. It has a similar level of risk and return as investing in the Shares option.
Australian Shares	Australian Shares – Indexed	The Australian Shares – Indexed option also invests in Australian shares. It has a similar level of risk and return.
Overseas Shares	Overseas Shares – Indexed	The Overseas Shares – Indexed option also invests in Overseas Shares. It has a similar level of risk and return.

The replacement option has not been chosen based on any other features of your Rest account and does not take into account your individual objectives, financial situation or needs.

No buy spread will be charged for the automatic switch

A buy spread represents the estimated transaction costs, including brokerage fees and stamp duty, incurred when buying underlying assets in relation to our investment options. If you're happy for us to move your current account balance into the relevant replacement option, no buy spread will apply when we action the automatic switch on 2 November 2024.

Otherwise, a buy spread will apply if you ask to switch your current account balance to another investment option or the replacement investment option(s) before they are closed (refer to section 5 below for more information).

04

Future contributions

Under current super rules, we're unable to automatically invest your future contributions into the replacement options.

What does this mean for me?

If you have super contributions invested in a closing option, you'll need to tell us which option you'd like us to invest your future contributions into.

What happens if I don't choose a new investment option?

If you haven't chosen a new option, any contributions received after 4pm, 29 October 2024 (AEDT), that were intended for a closing option, will be invested in our default MySuper product, the Growth investment option (known as Core Strategy until 30 September 2024). This also applies where your election covers less than 100% of those contributions – we will be required to invest the remaining portion of any future contributions in the Growth investment option. **You can find more information on the Growth option, including fees and costs and the level of investment risk, in this booklet.**

How to choose a different investment option for your contributions

You can change the option your contributions are invested in at rest.com.au/memberaccess or go.rest.com.au/election-form

05 Key dates

For the period from 25 September 2024 until the options are closed on 2 November 2024, there will be some restrictions in place. If you would like to switch options or change how your future super contributions are invested, it's important to be aware of these restrictions and what they mean for you.

We've included information on these restrictions and other key dates in the table below.

The current transaction restrictions for the Bonds and Shares options continue to apply until 4pm, 29 October 2024 (AEDT) when additional restrictions commence until the investment options are closed.

Transaction restrictions		
I want to...	Key date*	Details
Switch my investment options	4pm, 25 September 2024	Switches (into and out of closing options) will be processed as normal if received before 4pm, 25 September 2024. A buy spread will apply. After this date you won't be able to switch any additional money into the closing options. Restrictions apply after this date ¹ – see below. If you make any switches between 4pm, 25 September 2024 and 4pm, 29 October 2024, you'll need to switch 100% of your current account balance in a closing option to another option(s) ^{1,2} i.e. you won't be able to switch only some of it out. A buy spread will apply.
	4pm, 29 October 2024	After this time, you can no longer switch any of your account balance out of the closing options and your account balance in the closing option(s) will be automatically switched to the replacement option(s) on 2 November 2024. No buy spread will apply to the automatic switch. If you do request to switch out of a closing option between 4pm, 29 October 2024 and 2 November 2024, it won't be processed. You'll need to re-submit a switch out of the replacement option after 2 November 2024.
Make contributions to my super	4pm, 25 September 2024	You can choose which investment options your contributions are invested in as normal until 4pm, 25 September 2024. Restrictions apply after this date ¹ – see below. After 4pm, 25 September 2024 you'll no longer be able to choose that your contributions are invested into a closing option ¹ .
	From 29 October 2024	From 4pm, 29 October 2024, any contributions that you had instructed us to invest in a closing option will be invested in the Growth option unless you tell us to invest them in another option(s). You can change the option your contributions are invested in at rest.com.au/memberaccess or go.rest.com.au/election-form
Have my account balance automatically switched to the replacement option	2 November 2024	Any balance in a closing option at this date will be moved into the replacement option. If we can't close the investment options on 2 November 2024 due to unforeseen circumstances, we will confirm the new date on our website at go.rest.com.au/investment-refresh
Be notified the automatic switch of my account balance has happened	November 2024	We'll confirm that any balance in a closing option has been switched to the replacement option.

* All times stated in the table above are (AEST/AEDT).

¹ These restrictions have been in place for the Bonds and Shares options from 4pm, 27 September 2023.

² If you'd like to know more about our other investment options, you can read about them on the following pages and in the Investment Guide and Target Market Determination at rest.com.au/pds

06

Investment options

The next few pages show the investment options in detail, so you can compare them. We've explained the important terms used in the tables in the Growth example on the next page.

It's also important to know:

- Unless otherwise stated, the investment option returns (net of investment fees and tax) outlined in this document are to 30 June each year.
- For all options other than Growth and Sustainable Growth:
 - The amount in any asset class may change – up or down by 5% – from the benchmark allocation shown, but not below 0% or more than 100% for an individual asset class; and
 - Where an option does not currently have a benchmark allocation to Cash, we may decide to add an allocation of up to 5%.
- Investment options with an exposure to the Australian shares asset class may include companies listed in Australia but are based overseas. In addition, up to 10% of this asset class may be invested in stocks listed on the New Zealand Stock Exchange.
- Changes in exchange rates can either increase or decrease the value of overseas investments when converted into Australian dollars. For each option we decide (at least annually) how much overseas currency exposure we want to hold and we set a target. This helps to manage how much exchange rate changes may influence returns. We monitor the overseas currency exposure closely and may use financial instruments to ensure we stay close to our targets.
- Rest may vary the asset allocations (including the benchmark and ranges) of all or any of these options and introduce new options without prior notice. The asset allocations for each investment option are available at rest.com.au/investments/options
- The investment return objectives within this document are not guaranteed. The objectives shown are those for each option effective 30 September 2024.
- The asset allocations for each investment option on the following pages are the benchmark asset allocations for those options. They are indicative of how the investment options are invested.
- **Your investment in a Rest investment option is not guaranteed.**
- The value of your investment can rise or fall. The returns shown for each investment option are based on the past performance of the option in the market conditions at that time. These market conditions may not be repeated in the future. We've quoted these returns to indicate the expected relative performances of the investment options over the long-term.
- **Past performance is not an indication of future performance.** You should consider getting financial advice before making an investment decision.

Understanding your investment options

Name of investment option.

The goal for the investment option.

The return we are aiming to achieve for this investment option. It is not a guaranteed rate of return. The investment return objective refers to the objective effective 30 September 2024.

How this investment option is spread across the different categories of investments, asset classes.

The proportion of the various asset classes that make up this investment option.

The asset classes that make up this investment option showing benchmark allocations (and ranges for Growth and Sustainable Growth).

The suggested period of time that you keep your investment in this option.

A guide to the likely number of negative annual returns expected over any 20-year period.

Between 1 (very low) and 7 (very high). Refer to the Investment Guide at rest.com.au/pds for more information on the risk band and level.

Past performance is not an indicator of future performance.

What this investment option has returned in a particular year.

The annual average return of this investment option over a given time period.

Growth

Aim

Achieve a balance of risk and return by investing in both growth assets and defensive assets.

Investment return objective

CPI + 3% pa (after fees and tax) over rolling 10-year periods.

Asset allocation

A balance of growth and defensive assets, with a focus on growth assets (can range between 60-75% growth assets) consisting of shares and debt (both Australian and overseas), property, infrastructure, cash and other asset classes.

Minimum suggested timeframe

10+ years

Estimated number of negative annual returns over any 20-year period

4 to less than 6

Risk band and level

6, High

Yearly return

(what this option has returned)

Financial year ended	Super account
2020	-1.05%
2021	17.43%
2022	-2.37%
2023	9.26%
2024	8.67%

Annualised return pa

(period ended 30 June 2024)

Five year	6.14%
Ten year	6.75%

Cash	
Aim Achieve the investment objective by maintaining a defensive investment in bank deposits.	
Investment return objective Outperform the return of the Reserve Bank cash rate before tax and fees over rolling 1-year periods.	
Asset allocation Predominantly defensive assets (generally 100% defensive assets) consisting of deposits with major Australian banks. The portfolio currently invests exclusively into deposits with Australia and New Zealand Banking Group Limited (ANZ) (60%) and National Australia Bank Limited (NAB) (40%). The portfolio may also (but does not currently) invest in other deposits with, or short term discount securities (bank bills, negotiable certificates of deposit) issued by major Australian banks and short-dated debt issued and guaranteed by the Australian Commonwealth or State Governments. This option is not a deposit by you in a bank account and your balance is not guaranteed under the Australian Government bank deposit guarantee scheme.	
 <div>● Cash 100%</div>

Annualised return pa (period ended 30 June 2024)	
Five year	1.91%
Ten year	1.97%

Capital Stable	
Aim Provide a stable pattern of returns whilst maintaining a low probability of a negative return in any one year.	
Investment return objective CPI + 1% pa (after fees and tax) over rolling 10-year periods.	
Asset allocation Primarily defensive assets (can range between 60-75% defensive assets) consisting of mainly debt (both Australian and overseas) and cash, with a smaller proportion of shares (both Australian and overseas), property, infrastructure and other asset classes.	
 <div>● Cash 20% ● Debt 35% ● Alternatives 3% ● Infrastructure 12% ● Property 10% ● Australian shares 8% ● Overseas shares 12%</div>

Annualised return pa (period ended 30 June 2024)	
Five year	3.59%
Ten year	4.26%

Unless otherwise indicated, the information in this table is effective from 30 September 2024.

Balanced	
Aim Achieve a balance of risk and return by investing in approximately equal proportions of growth assets and defensive assets.	
Investment return objective CPI + 2% pa (after fees and tax) over rolling 10-year periods.	
Asset allocation A balance of growth and defensive assets (can range between 45-60% growth assets) consisting of shares and debt (both Australian and overseas), property, infrastructure, cash and other asset classes.	
 <ul style="list-style-type: none">Cash 11%Debt 25%Alternatives 2%Infrastructure 12.5%Property 9.5%Australian shares 16%Overseas shares 24%

2023	6.93%
2024	6.71%
Annualised return pa (period ended 30 June 2024)	
Five year	5.02%
Ten year	5.65%

Balanced - Indexed	
Aim Achieve the investment objective through an indexed based investment in a mixture of growth and defensive assets.	
Investment return objective Perform in line with the benchmark return (before tax) over all time periods. The benchmark is calculated using the S&P/ASX300 Accumulation Index, the MSCI World ex-Australia ex-Tobacco Net Dividends Reinvested Index, the Bloomberg AusBond Composite 0+ Years Index, the JP Morgan Government Bond Index - Global Hedged in AUD and the Bloomberg AusBond Bank Bill Index.	
Asset allocation A mix of growth and defensive assets, with a focus on growth assets (can range between 70-85% growth assets) consisting of shares and debt (both Australian and overseas), and cash.	
 <ul style="list-style-type: none">Cash 5%Debt 20%Australian shares 30%Overseas shares 45%

Annualised return pa (period ended 30 June 2024)	
Five year	6.14%
Ten year	6.75%

Sustainable Growth	
Aim Maximise returns over the long term by investing in a diversified portfolio with enhanced environmental, social and governance investment characteristics that is weighted towards growth assets.	
Investment return objective CPI + 3.5% pa (after fees and tax) over rolling 12-year periods.	
Asset allocation A mix of growth and defensive assets, with a focus on growth assets (can range between 70-85% growth assets) consisting of shares (both Australian and overseas), property, infrastructure, other asset classes plus smaller amounts of debt (both Australian and overseas) and cash.	
<ul style="list-style-type: none">Cash 4% (0-10%)Debt 6% (0-15%)Alternatives 1% (0-5%)Infrastructure 8% (0-15%)Property 6% (0-15%)Australian shares 30% (25-35%)Overseas shares 45% (40-50%)	
Minimum suggested timeframe 12+ years	
Estimated number of negative annual returns over any 20-year period 4 to less than 6	
Risk band and level 6, High	
Yearly return (what this option has returned)	
Financial year ended	Super account
2022	-6.62%
2023	11.68%
2024	9.68%
The inception date of this option is 29 March 2021. The 2022 return is the first full year return available. Five and ten year annualised returns are not yet available. Further details of the enhanced social and governance characteristics of the Sustainable Growth option are set out in the Investment Guide available at rest.com.au/pds .	

Unless otherwise indicated, the information in this table is effective from 30 September 2024.

High Growth	
Aim Maximise returns over the long-term by investing predominantly in growth assets.	
Investment return objective CPI + 4% pa (after fees and tax) over rolling 12-year periods.	
Asset allocation Strongly focused on growth assets, with a minor allocation to defensive assets (can range between 80-90% growth assets) consisting of shares (both Australian and overseas), property, infrastructure and other asset classes.	
 <ul style="list-style-type: none">Debt 4%Alternatives 1.5%Infrastructure 8.5%Property 6%Australian shares 32.5%Overseas shares 47.5%

Yearly return (what this option has returned)	
Financial year ended	Super account
2020	-6.72%
2021	26.05%
2022	-5.69%
2023	14.55%
2024	11.45%
Annualised return pa (period ended 30 June 2024)	
Five year	7.20%
The inception date of this option is 6 December 2018. The 2020 return is the first full year return available. Ten-year annualised returns are not yet available.	

Unless otherwise indicated, the information in this table is effective from 30 September 2024.

Overseas Shares – Indexed	
Aim Achieve the investment objective through an index based investment in overseas shares.	
Investment return objective Perform in line with the MSCI World ex-Australia ex-Tobacco Net Dividends Reinvested Index (unhedged in AUD) (before tax) over all time periods.	
Asset allocation Predominantly growth assets (can range between 90-100% growth assets) consisting of overseas shares. <div><div>● Overseas shares 100%</div></div>	
Minimum suggested timeframe 12+ years	
Estimated number of negative annual returns over any 20-year period 4 to less than 6	
Risk band and level 6, High	
Yearly return (what this option has returned)	
Financial year ended	Super account
2020	3.82%
2021	25.13%
2022	-6.02%
2023	20.54%
2024	18.07%
Annualised return pa (period ended 30 June 2024)	
Five year	11.68%
The inception date of this option is 6 December 2018. The 2020 return is the first full year return available. Ten-year annualised returns are not yet available.

Investment costs

The total investment cost for each investment option is made up of:

- investment fees and costs (including performance fees) and
- transaction costs.

More information about how annual investment fees and costs are calculated is shown below.

The amount of investment fees and costs, performance fees, transaction costs, and buy-sell spread may change without giving prior notice. These costs can be different each year for each investment option. The table below shows the investment fees and costs and transaction costs for the financial year ended 30 June 2024.

The performance fees shown are generally based on the average of the actual and estimated performance fees for the 5-year period ending 30 June 2024.

The actual amount charged in future financial years will depend on the actual costs incurred in those years and may be higher or lower than past fees and costs and may change without prior notice. For more information on fees and costs, please see the Additional Information on Fees and Costs document at rest.com.au/pds.

Investment fees and costs

Investment fees and costs

The investment fees and costs shown above are deducted from the assets of the relevant investment options before we determine the unit price. These investment fees and costs are shown as an annual percentage of the net assets of each investment option.

Where there is a tax benefit available to the fund for these investment fees, costs and expenses, we pass this benefit onto members through lower taxation and reduced investment fees and costs. On your annual statement you'll see an estimate of the investment fees and costs (including performance fees) that have been applied to your investment options for the year.

Performance fees

Rest does not charge a performance fee. However, some investment options may incur performance fees which are included as part of the investment fees and costs. Performance fees are only charged if investment managers outperform an agreed target return, which may result in the investment fees and costs changing from time to time. Performance fees and target returns may also vary from year to year.

The performance fees shown in the table above are generally based on the average of the actual and estimated performance fees for the 5-year period ending 30 June 2024. See the 'Performance fees' section in the Additional Information on Fees and Costs document at rest.com.au/pds for more information.

Performance fees for each investment manager may be calculated differently. However, they are all:

- only payable to a manager if they exceed a target level of return;
- calculated when paid or payable, and incorporated into the calculation of unit prices;
- typically payable periodically (for example, annually).

Transaction costs

Transaction costs vary depending on the investment option you have selected. These costs can include expenses such as brokerage costs, settlement fees, stamp duty, and buy-sell spreads. These are actual and estimated costs based on the information provided to Rest and will vary from year to year.

Transaction costs are deducted from the assets of the underlying investment option and are reflected in the investment option's unit price. The transaction costs shown in the table above are net of amounts recovered through the buy-sell spread.

Buy-sell spread

A buy-sell spread represents the estimated transaction costs, including brokerage fees and stamp duty, incurred when buying or selling underlying assets in relation to our investment options.

The spread charged is an additional cost to you when any of the following occurs:

- you contribute or withdraw from your account
- you switch between investment options
- any other transaction is processed in your account balance (for example, deduction of fees or insurance costs).

No buy spread will be charged when we automatically switch you into a replacement option.

A buy spread will apply if you ask to switch to another investment option or the replacement investment option(s) before they are closed.

Buy-sell spreads are not a fee paid to Rest but are used to meet underlying asset transaction costs when incurred. They are set by the Trustee and may change within the range without prior notice. The spreads will be reviewed on a regular basis and are available online at rest.com.au/super/buy-sell-spread. You should consider these costs when making any investment decision.

The table below shows the current buy-sell spreads.

Buy-sell spreads				
Investment option	Buy spread	Buy spread range	Sell spread [^]	Sell spread range [^]
Investment option				
Cash	0.00%	0.00 - 0.01%	0.00%	0.00 - 0.01%
